AUG 0 4 2010

Thomas Bakaly, City Manager
Park City Municipal Corporation
P.O. Box 1480
Park City, UT 84060-1480

Dear Mr. Bakaly,

I am writing in response to the phone call Mayor Williams placed on July 30, 2010, and your August 3, 2010, letter in which you requested approval to haul an additional 12,000 cubic yards of waste material to the Superfund repository at Richardson Flats. At this time it is our understanding that Park City has 5,500 cubic yards of not yet utilized waste capacity at Richardson Flats of the 15,000 cubic yards that EPA authorized in June 2010. As the EPA Region 8 Administrator, James Martin, stated in his June 14, 2010, letter to Park City Mayor, Dana Williams, we remain prepared to allow Park City to dispose of another 35,000 cubic yards "once Park City has submitted, and EPA approved, a workplan to site and develop an additional repository." If you can accelerate the pace of the development of the workplan for the new repository, EPA will expedite our review of that document. Once the review and approval process is complete, EPA is willing to authorize Park City to haul 35,000 cubic yards of additional waste material to Richardson Flats.

If you have any questions, please feel free to contact me at 303-312-6776 or by email at hestmark.martin@epa.gov.

Sincerely,

Martin Hestmark,
Deputy Assistant Regional Administrator
Office of Ecosystems Protection
    and Remediation
